

## RECAP

REPORTS, EVALUATIONS,  
COMPLIANCE, & PROCESSING

With more advanced functionality than Microsoft Access, GEC's Reports, Evaluations, Compliance, and Processing application has four add-on features that use web services to extract information from databases and present it in useful formats.

### Reports

Generate custom letters and reports of water system and compliance data

### Dashboard

Track to-do list of compliance issues that need to be addressed

### CCRs

Create customized Consumer Confidence Reports for your public water systems

### PWS Status

Review the health of a water system quickly against agency-established criteria

# GEC

SAFE WATER INFORMATION  
MANAGEMENT AND REPORTING

## HIGHLIGHTS AND FEATURES

### Benefits

- ✔ RECAP has more advanced functionality than Microsoft Access databases
- ✔ RECAP's four add-on features use web services to extract information from databases and present it in useful formats
- ✔ Quickly generate reports and metrics to assist agency staff with compliance determination and keeping water systems in compliance with the SDWA regulations
- ✔ RECAP can be integrated with other GEC applications to display information

### Dashboard

- ✔ Ensures things don't fall through the cracks and helps staff keep up with routine compliance activities
- ✔ Tracks to-do list of tasks that can be marked as completed so managers can see if staff are addressing issues
- ✔ Helps rule managers, compliance and enforcement staff, and supervisors focus using grids, metrics, and graphs on an uncluttered dashboard

### Reports

- ✔ Generates custom reports, outputs, and letters to help primacy agencies quickly review water system data and compliance information
- ✔ Letters, reminders, and reports can be sent to water systems to help them remain in compliance with SDWA regulations

### CCR's

- ✔ Creates federally-compliant Consumer Confidence Reports, plus allows for customized appearance, data, and content based on state requirements (and preference)
- ✔ Individual CCRs in Word can be further customized before sending to water systems

### PWS Status

- ✔ Draws from multiple information sources to conduct a health status check that indicates whether a water system complies with regulations or state-established criteria
- ✔ Can be used to assist with State Revolving Loan Funds, capacity development, renewing operating permits, targeting technical assistance, and other evaluations
