

SWIFT SURVEYS

The SWIFT Surveys electronic site visit tool speeds up and simplifies completion of site visits, sanitary surveys, assessments, or other inspections and fully integrates with SDWIS. The app helps state agencies transform how they assess the condition of public drinking water facilities.

State-customized checklist of questions for evaluation

Decrease the time and resources needed to complete a survey

Consolidates inspection notes, corrective actions, and enforcement activities

Mobile application to use offline

Let GEC take care of modernization for you!

As soon as EPA provides compatibility with interfacing applications, GEC will take care of the transition of SWIFT Surveys to the new system.

SWIFT
SURVEYS

HIGHLIGHTS AND FEATURES

Automate/Streamline

- ✔ Empowers inspectors to handle all their survey needs in one place with no need for paper documentation
- ✔ Decreases the time and resources needed to complete a survey
- ✔ Works fluidly online and offline; it's accessible whether you have strong Internet access or not
- ✔ Uses customized site visit inspection templates to trigger a survey checklist which guides the inspector through what needs to be inspected for the individual water system
- ✔ Streamlines and organizes in a user-friendly way so the inspector only sees what's assigned and completes tasks in as few button clicks as necessary

Customize

- ✔ Based on stakeholder feedback, GEC continues to add enhanced functionality and flexibility to the app
- ✔ Question sets, letters, and reports can be customized to meet agency and district or field office specifications

Message

- ✔ Uses email messaging to support collaboration between team members

Collaborate

- ✔ Allows supervisors and managers to validate that survey details meet agency standards and EPA regulations
- ✔ Communicates with SDWIS, migrating the data you choose with the simple click of a button

Integrate

- ✔ Water system inventory updates can be performed before, during, and after an onsite survey
- ✔ Inventory data is loaded into SWIFT at the beginning of the survey so the agency keeps the master copy of record in its database until submission

Comply / Report

- ✔ Allows inventory changes captured in the field to be migrated to SDWIS
- ✔ Allows agencies to review unresolved deficiencies from previous site visits to ensure all water system compliance issues can be addressed
- ✔ Metrics, site visit letters, and reports can be customized to meet agency needs

GEC meets top notch SOC 2 Type 2 security standards within its Microsoft Azure Government Cloud
